CLASSIC SERIES FRESH WATER PUMPS

SHURflo 2088 PUMPS

The SHURflo® model series 2088 pumps have three independent pumping chambers, giving you three-way dependability. The pump's unique design has no moving parts traveling more than 1/8"; this greatly reduces friction and "wear and tear." This means greater dependability and longer life. Designed for coaches featuring multiple water outlets. Tested for flow and pressure. Includes instructions and fittings.

STANDARD 2088 PUMP FEATURES

- Extra quiet, thanks to the ball bearing pump head—virtually inaudible in a standard installation.
- Self-priming: starting "bone dry", the SHURflo® pump will prime itself even though the water tank may be six feet below the level of the pump.
- Runs dry, even for a considerable time without causing damage—a relief if your water tank should go dry.
- Energy saver: uses only 4 amps of power while working.
- Built-in check valve protects against the dangers of high pressure (up to 200 psi) in city water lines.
- Big flow: up to three gallons per minute
- Standing idle, the pump springs into action, even after months without being used.
- 2-yr. mfr. warranty.

PREMIER MULTI-FIXTURE DEMAND WATER PUMP

- Model 2088-453-444 pumps up to 3.5 gpm, up to 45 psi.
- Heavy-duty permanent magnet motor provides low current consumption. 4.0 amp draw.
- Double ball bearing drive is extra quiet.
- Features easy-to-install low-profile snap action switch.

SHURflo PUMP SILENCING KIT

Connects to the inlet and outlet of your water pump to silence unwanted pump noise while reducing water hammering. Kit includes 2 ea 36" soft tube risers and 2 ea 1/2" male connectors for connection to any RV pump.

28162 Pump Silencing Kit #94-591-01 1

SHURflo WHISPER KING PUMP

The quietest standard pump on the market! Designed and constructed for high performance, reliability and serviceability. This 2 gpm fresh water demand pump can lift water 7 feet and run dry without damage. Features a sound absorbing base plate for ultra-quiet operation, a built-in check valve that prevents damage from high city water pressures up to 200 psi and automatic demand. Mounts in any position. Precision matched low rpm permanent magnet motor and pump head assure long-life and top performance. 2-yr. mfr. warranty.

NAUTILUS™ SINGLE-FIXTURE PUMP

Designed for the smaller, single-fixture RV. Install this pump near the water tank... above or below the water level. It primes itself and delivers a smooth, steady flow of water on command. Its unique design also guards against the age-old problem of air lock. 3/8" barb ports, thermally protected.

2.5 amp draw. 12VDC. 1-yr. mfr. warranty.

20605 1.0 gpm Single-Fixture Pump #100-009-21 6

EXTREME™ SERIES

SMART SENSOR™ 4.0
Specifically designed for small to mid-sized RV's
28260

SMART SENSOR™ 5.7
Specifically designed for larger RV's

SHURflo EXTREME™ SERIES SMART SENSOR™ 5.7

Many RV'ers today are demanding more flow and less noise from their water pump. SHURflo has engineered the ultimate solution. The Extreme Series™ Smart Sensor™ 5.7. The Smart Sensor is a micro-processor controlled variable-speed pump that quietly delivers 5.7 gallons per minute and pressure up to 65 psi for "just like home" flow. SHURflo's Smart Sensor precisely monitors your system's water pressure and adjusts the motor's speed, thus eliminating the need for a pressure switch.

SMART SENSOR™ 5.7 FEATURES:

- 5 chambered high flow pump.
- Large inlet and outlet valve passages.
- Variable speed pump controlled by Smart Sensor™ microprocessor. No rapid cycling.
- More enjoyable showers!
- Impressive multi-fixture flow.
- High pressure @ 65 psi [4.5 bar].
- No pressure switch needed.
- Quiet operation at any flow/pressure condition.
- Seamless heat electro-coated motor shell.
- Automatic voltage protection.
- Current limiting at 10 amps max.
- Voltage: 12-V.
- Dimensions: 9.25" x 5.0" x 4.72".
- Flow rate: 5.7 gpm (21.6 lpm). "Just like home."
- Amps (max): 10.
- Shut-off pressure: 65 psi (4.5 bar).
- 3-yr. mfr. warranty.

27681 Extreme Series Pump Smart Sensor™ 5.7 #5900-0211 [g](#)

EXTREME™ SERIES SMART SENSOR™ 4.0

Designed specifically for mid-sized RVs. The Smart Sensor™ 4.0 is a micro-processor controlled variable speed pump that quietly delivers 4 gpm and pressure up to 50 psi for "Just like home" flow.

SMART SENSOR™ 4.0 FEATURES:

- 4 chambered high flow pump.
- Extra large valve passages.
- Variable speed/no cycling.
- Micro-processor controlled.
- 3-yr. mfr. warranty.
- More enjoyable showers.
- Impressive dual-fixture flow.
- Ultra-quiet performance.
- "Just like home" flow.

28260 Extreme Series Pump Smart Sensor 4.0 #4900-0211 [g](#)

SHURflo EXTREME™ SERIES HIGH FLOW STRAINER

Keep your Smart Sensor™ 5.7 pump flowing strong by protecting it from debris in the water. SHURflo highly recommends the use of the Extreme™ Series High Flow Strainer. Engineered to complement the Smart Sensor's higher performance, the High Flow Strainer is easy to install, and even easier to clean.

27894 High Flow Strainer #254-266 [24](#)

SHURflo ACCUMULATOR TANK

Pre-charged accumulator tank controls water pressure; reduces cycling pulsation and harmful pressure spikes while minimizing power usage. Quiet accumulator mounts in any position, and is compatible with hydraulic shut-off valves. Internal bladder keeps air from dissolving into the water. Pre-charged pressure is 30 psi; maximum operating pressure is 125 psi. The 1/2" x 14 MPT x 2 liquid inlet and outlet ports are interchangeable.

24562 Accumulator Tank #182-200 [12](#)

VALTERRA RV PUMP KIT

These flexible high-pressure pigtails absorb the initial surge of pressure when your pump cycles on and off eliminating noises like water hammer associated with your rigid fresh water plumbing. Includes two high-pressure hoses 1/2" x 36" and two nylon fittings for adapting female threaded fittings.

20083 RV Pump Kit #P23512PB [g](#)

SHURflo EXTREME SERIES PUMP FITTINGS

Quick connect/disconnect fittings to help you customize the installation of your Smart Sensor™ 5.7 pump. Use to adapt Extreme Series pump (#27681) to non-standard applications.

THE RV WATER SYSTEM THAT FUNCTIONS JUST LIKE AT HOME!

AQUAJET VARIABLE SPEED RV WATER PUMP

The Aquajet RV pump employs state-of-the-art electronics to automatically control motor speed—the pump actually adjusts its speed as you open and close water fixtures. Aquajet's soft start feature eliminates annoying rapid cycling, and its exclusive 5-valve design can deliver twice the flow and pressure of conventional RV industry pumps. • **Greater flow**— The Aquajet automatically overcomes pressure drops typically caused when multiple fixtures operate at the same time. Aquajet's patented 5-chamber design displaces substantially more water per motor revolution than typical 3- and 4-chamber models currently used in the RV industry, making it one of the highest-flow diaphragm pumps available. • **Positive shut-off** at 75-85 psi, to keep up with today's sophisticated filtration systems and extensive plumbing systems. • **Silent operation**— At performance levels similar to competitive pumps, the Aquajet will be as much as 90% quieter, due to slower speed and superior hydraulic energy transmission. • **Smoother flow**— Aquajet's patented variable speed controllers, with additional "smart" features, eliminate all rapid cycling within normal flow ranges. The innovative 5-chamber construction, including the patented screw-free diaphragm, minimizes pulsation found in other pumps. • **Longer switch life**— Electronic control circuits and integral pressure switch minimize switch arcing during starts and stops. • **Easy installation**— Universal mounting option allows easy retrofits for virtual plug-and-play performance. • **2-year mfr. warranty.** • **Fittings**— Pump includes 2 quick connect fittings with 1/2" male thread size to fit standard pump filter and other industry standards. • **Safety features**— The Aquajet includes valuable safety features not found on other pumps, including low voltage protection (to protect the pump from weakened battery power conditions) and a maximum pressure bypass (to protect the coach's plumbing system from excessive pressurization).

ES "EFFICIENCY SERIES" FOR ANY RV

The ES brings variable speed technology to virtually any RV water system. Smaller coaches can be upgraded with the ES, because this pump has been specifically designed for after market installations. **Powerful Flows**— The ES delivers

a 3.5 gpm flow rate, higher than nearly anything else for the RV industry. Reduced power consumption helps ensure compatibility with existing electrical systems. **Silent Operation**— The ES version is even quieter than the Aquajet RV version. The patented, variable speed controller and "soft-start" features eliminate most cycling related noises. **Easy Installation**— Lower amperage draws eliminate the need to use electrical relays, etc., regardless of current electrical configurations. Installation is simplified to the point of true "plug-and-play performance."

AQUAJET PUMP SPECIFICATIONS

Motor:	12VDC, permanent magnet, totally enclosed, non-ventilated
•Type	
•Temp Limits	Capable of sustaining continuous running for 1 hour (RV) or more (ES) before auto reset thermal shut-off.
Speed Controller	Factory set 10-Amps & 6.5-A (RV & ES series). Thermally protected. Automatic reset.
Pump Design	5 chamber diaphragm pump, self-priming, can run dry
•Pump Housing	Polypropylene Material
•Controller Housing	Nylon
•Valves	EPDM
•Diaphragm	Santoprene
•Fasteners	Stainless steel
Liquid Temperature	140°F (60°C) max.
Pump Certifications	IAPMO, NSF
Priming Capabilities	13 feet (RV), 10 feet (ES)

The new Charge n' Flow pump is rechargeable, submersible, and is designed for a wide variety of applications, both onboard and ashore.

FLOJET ITT FLOJET CHARGE N' FLOW PORTABLE PUMP KIT

Charge N' Flow is the first portable pump of its kind to include three convenient power options making pumping on the go both easy and flexible. Just Charge and Pump! It's capable of pumping hot or cold freshwater, seawater, antifreeze and even diesel. Because of its portability, it is also ideal for many household applications. The kit comes complete with a 12 volt 280 GPH pump, eight feet of hose, spray nozzle, enclosed battery, AC battery charger, battery clip adaptor, and a vehicle power adaptor. It also includes a filter for use in submersible mode, or when the filter is removed, the pump can be used in line.

The pump is compact, only 5.5 inches tall and 1.5 inches in diameter. It can handle up to 100 gallons of water per charge. When connected to a car battery, it can pump endless amounts of water!

Other Specifications: Charge Time: 10-12 Hours; Case Dimensions: 8.5" x 12" x 4.25"; Hose Outlet: 1/2"; Pressure: 11 PSI; Pump Materials: Acetal; Amp Draw: 12.0 V @ 2.0 Amps; Fuse Size: 5.0 Amps; Max Head (Height): 26' @ 12 V; Battery: 2000 mAh "AA" Ni-MH x 8 cells, Included with Kit.

Multiple Uses for Indoor & Outdoor.

The charge n' Flow submersible pump is ideally suited for pumping fresh and sea water or diesel, diesel refuelling and transfer, home & garden, plumbing, windshield fluid transfer, camping & kayaking, washdown for cars, RV, anchors and boats, bilge or storm water emptying.

87255 Charge n' Flow Portable Pump Kit #RP280KR 4

PAR PUMP & FAUCET

Economical centrifugal pump is whisper quiet and delivers a generous 1 gpm flow at the lowest current draw. Water may "free-flow" through pump which mounts directly at output port on most water tanks. 12V; approx. 1.6 Amps. Faucet includes switch. Both faucet and pump have 3/8" barb fittings.

Revolution™
4008 FRESH WATER PUMP

**SHURflo
REVOLUTION™
MULTI-FIXTURE
AUTOMATIC DEMAND PUMP**

- Quiet and reliable
- Reduced Cycling with patent-pending Reaction Flow Technology™
- Modern 'green' design for reduction of hazardous waste and power consumption
- 3 GPM and 55 PSI high performance
- Powerful 7.5 Amp motor
- Automatic thermal overload protection
- Runs dry without damage
- Built in check valve prevents backflow
- Dry primes to 6 vertical feet
- Automatic demand

Mounts in any position.

Unique one-piece diaphragm and internal by-pass assure long life and top performance in any plumbing system. Designed and constructed for high flow, low noise, no rapid cycling and SHURflo reliability, this fresh water demand pump is super quiet and can run dry without damage.

LEISURE COMPONENTS TRIPLE ACTION HAND PUMP AND WATER FIXTURE

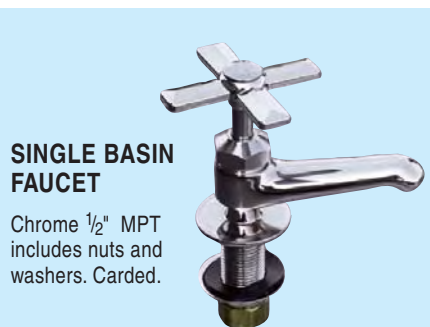

Combo Hand Pump mounts above the counter; **Low Boy Hand Pump** fits down into counter top. Both feature 3-way action: • Full stroke of the handle delivers a constant high volume water flow from the diaphragm hand pump. • Finger tip lift of the handle to the up position activates a single-fixture electric pump. • Finger tip push of the handle to the down position delivers a steady flow of water from a city water hook-up. Either can be set up to perform any combination of the above functions. **20231** is 4" x 4" x 2" H; **20233** is 4" x 4" x 2 1/2" H. **Repair kit** for all #131 models includes a spout seal, seal washers, washer spacer, retainers, seal-poppets, plunger, diaphragm, diaphragm support, washer and screw, gasket, and spring. Completely re-builds all #1311 models.

RV Faucet Specialists
Now Offering DuraPro™ Plastic and Low Lead or No Lead Brass

All Phoenix and Catalina Faucets Meet or Exceed Requirements Established by the Safe Drinking Water Act (NSF Standard 61.9)

An American Family Tradition Since 1894

Catalina imported faucets are designed and engineered in the US and quality checked in our factory before final shipment. All Phoenix products come with a limited lifetime

All **Catalina** faucets include:

- Quarter Turn Cartridge
- ADA Compliant Lever Handles
- Sleek Contemporary Style
- Scratch & Stain Resistant Finishes

PHOENIX®
FAUCETS

An American Family Tradition
Since 1894

All Phoenix Faucets have a limited lifetime warranty.

PHOENIX FAUCETS – CATALINA SERIES

Catalina underbodies are made of a durable synthetic polymer that resists corrosion, rust and mineral buildup, most use our unique spin welding process to create a one piece underbody eliminating o-rings that can cause leaks. Lever handles offer smooth flow control with ADA compliant handles for easy operation.

- Sleek contemporary styling.
- High luster, scratch and stain resistant finish.
- One-piece, spin welded underbody means no o-ring seals.
- Aerated, splash-free water flow.
- Quarter turn washerless cartridge.
- Smooth flow control with ADA compliant lever handles.

Two handle 4" diverter lavatory faucet with a D-spud for attaching a hand held shower.
