SEWERSOLUTION

Now you can dump and clean your holding tank without exposure to raw sewage or odor, through a 3/4" plastic dump hose. 3" sewer hose is no longer necessary! Attach your garden hose and a high-velocity water-jet creates a powerful venturi-effect pumping action that pulls sewage from RV and ejects it out the discharge hose. The shear force of the water-jet liquefies waste and tissue. Pumps up to 8 gal./minute up to 30' with the 3/4" dump hose. Includes clear polycarbonate pump unit, 10' SewerSolution dump hose, garden hose quick-connect with back-flow preventer and adapter for connecting to 3" and 4" sewer pipes or 1" PVC pipe. • Dump hose is 10' L—no stretching needed. • Add extensions for longer reach. • Pumps up to 60' if using 1" PVC pipe. • Self-cleaning. • Even pumps sewage up to 3' above tank level. • Fast! Empties a 20 gal. tank in only 2.5 minutes, then flushes everything downstream of the gate valve with clean water. • Requires a minimum of only 15 psi water pressure through your garden hose.
