TOWING PRODUCTS

Weight Distribution Hitches

HUSKY CENTER LINE™ Towing System

The Center Line Torsion Weight Distribution Hitch and Active Sway Control System is the next generation in towing safety and performance.

The **Center Line** Torsion Weight Distribution and Sway Control System is the industry's first self centering sway control system, to provide you with complete confidence during your towing experience. Compression cylinder action and torsion spring bars work together to distribute weight and oppose trailer sway before it begins, keeping your trailer straight and on center, giving you increased control. The **Center Line** system can be used in all driving and weather conditions **including backing-up**. The "Easy Adjust" head alignment systems allow quick and easy set-up at the time of installation. The **Center Line** system is backed by a limited lifetime warranty for as long as you own the product (for complete warranty details visit www.huskytow.com/support.)

ADVANTAGES OF HUSKY'S CENTER LINE ACTIVE SWAY CONTROL TECHNOLOGY

- Compression cylinder design applies counter pressure to actively control trailer sway.
- Eliminates use of clamped friction materials.
- Provides constant pressure to re-center the trailer behind the tow vehicle.
- Can be used while backing up.
- Tapered torsion spring bars help transfer weight between all axles of the two vehicles for safe towing.
- Next Generation Patent Pending Technology.

The **Center Line** system overcomes many problems associated with the equalizing hitches and passive friction sway controls that have been in use for the past 30 years:

- No more removing the sway control when backing up! The **Center Line** system is *designed for your convenience*.
- No more waiting for the trailer to right itself as passing trucks, wind or road conditions cause sway. The **Center Line** system is *self-centering*.
- You don't have to hear our system to know it's working. The **Center Line** system's advanced technology *significantly reduces noise* common with old technology systems.

CENTER LINE Patent Pending

CENTER LINE HEAD ASSEMBLY KIT

Includes head assembly, spring bar brackets, 10" shank and hardware kit. Spring bars not included, required to complete hitch (see below).

Tongue Weight Range	Gross Trailer Weight	Part #
500–1,400 lbs.	4,000–14,000 lbs.	31390

CENTER LINE SPRING BARS ONLY

Match the spring bar rating to the trailer weight. Spring Bars have metallic gray textured finish. Sold in pairs.

Tongue Weight Range	Gross Trailer Weight ¹	Part #
500–800 lbs.	Up to 8,000 lbs.	31511
801–1,200 lbs.	Up to 12,000 lbs.	31512
1,001–1,400 lbs.	Up to 14,000 lbs.	31513

CENTER LINE SHANKS

Shank Length	Shank Rise	Shank Drop	Part #
10" Forged	7-1/2"	1/2"	31552
12"	7-1/2"	1/2"	30855
14"	7-1/2"	1/2"	30856
10"	10-3/4"	3-3/4"	30857
14"	10-3/4"	3-3/4"	30858
12"	13-1/4"	8-1/4"	30859

¹ SAFETY TIP: Do not use the Center Line Hitch with loaded trailers under 4000 lbs.

Trunnions activate the compression cylinders to re-center the trailer behind the tow vehicle.

Compression cylinder creates resistance to the sway.

The "Easy Adjust" head alignment systems allow quick and easy installation set-up.

Streamlined sturdy bracket design instead of chains for easier set-up.

Tapered torsion spring bar provides proper weight distribution.

Weight Distribution Hitches

HUSKY
TOWING PRODUCTS

Weight distribution hitches evenly distribute weight over the entire length of tow vehicle and trailer, resulting in a more level ride with more control and stability, better braking, less strain on vehicle and increased towing capacity.

Without Weight Distribution

With Weight Distribution

WEIGHT DISTRIBUTION HITCH FEATURES

- Husky's hitch head design reduces installation time.
- Open hitch head design allows easy access to hitch ball shank.
- Hitch head features built-in sway control ball platform.
- Hitch head accepts different spring bar capacities for maximum versatility and reduced inventory.
- Black polyester finish resists rust and corrosion.

- Lift brackets allow safe and easy hitch hook-up.
 - Interchangeable spring bars fit left or right sides of hitch head.
 - Includes assembly hardware and chains.
 - Hitch ball not included. Be sure to match ball capacity to gross trailer weight.
 - Available with or without ball mount shank (#07660).
- See the Husky Parts pages for hitch replacement parts.

Round Bar Weight Distribution Hitch

Weight Distribution Hitch with Bolt-Together Ball Mount/Shank Assembly. Available with or without #07660 weight distributing shank.

- 8" total height adjustment. • Rise: 5-5/8"; Drop: 2-3/8". • Shank length: 10". • Ball to pin hole: 12-3/4". • Dual sway control platform.
- Raised ball platform for greater coupler clearance. • Balls not included; 1-1/4" hole on head assembly requires 1-1/4" shank on trailer ball.

****07036 requires a 2-1/2" receiver; do not exceed the vehicle's owners manual rating.**

WEIGHT DISTRIBUTION HITCH, ROUND BAR: FULL SIZED TRAILERS

ROUND BAR		Complete Assembly (W/ Shank Assembly)	(Without Shank)
Tongue Wt. Range ‡	Gross Trailer Wt. ‡	Part #	Part #

Trunnion Bar Weight Distribution Hitch

Bolt-Together Hitch Head/Shank Assembly. • Fits Class III / IV 2" receivers • Bolt-together head with 8" of height adjustment • Black baked-on polyester powder-coat finish for superior rust protection • 5-year limited warranty. • 8" total height adjustment. • Rise: 7-1/2"; Drop: 1/2". • Shank length: 10". • Ball to pin hole: 12". • Balls not included; 1-1/4" hole on head assembly requires 1-1/4" shank on trailer ball.

Pin Trunnion

WEIGHT DISTRIBUTION HITCH, TRUNNION BAR: FULL SIZED TRAILERS

PIN TRUNNION BAR		Complete (W/ Shank Assy.)	
Tongue Wt. Range‡	Gross Trailer Wt.‡	Part #	
300-500 lbs.	5,000 lbs.	07026	*
300-500 lbs.	5,000 lbs.	07027	**
501-800 lbs.	8,000 lbs.	31331	
801-1,200 lbs.	12,000 lbs.	31335	

* With offset snap up brackets. ** 6-1/2" total height adjustment, rise 4-3/4", drop 1-3/4", shank length 8-3/8", ball to pin hole 12-1/4".

‡ Limited to Vehicle Tow Rating; see Vehicle owners Manual.

PIN TRUNNION FEATURES: **A** Raised ball platform for greater coupler clearance, turning radius, access to trailer ball nut. Only 4" of ground clearance required to insert spring bars into pin trunnions. **B** Built-in dual sway control platform allows the use of either left or right sway control. When towing trailers longer than 24 feet, a second sway control should be added. **C** Spring bars are easily removed from pin trunnions with safety D-clips. Pin trunnions remain attached to head. **D** Unique pin trunnions attach to head using Grade 5 bolts instead of the standard knuckles. No need to remove pins so head stays clean and free of grease.

Balls not included

HUSKY INDEX

Fifth Wheel Hitches

HUSKY
TOWING PRODUCTS

Husky Tilt Plate 16K S Straight Jaw Fifth Wheel Hitch (Husky Silver Series)

Husky 16K S Tilt Plate Design Advantages:

- Addition of a pop out safety hookup indicator
- Engineered/designed tolerances for less noise
- Better fit of components for consistent performance and a quieter ride
- Fore and aft adjustment on the uprights for proper "hitch over axle" placement
- Unlike some slide bar style hitches, the sides of the 16K S are open and allow the king pin to swing without hitting the sides of the head
- Meets or exceeds SAE J2638 fifth wheel standards
- Superior finish
- Yellow zinc fasteners
- Compatible with all Husky custom install kits and earlier model X-16 Husky hitches

The 4-way side to side, front to rear pivoting tilt plate provides easy hookup in most situations. The locking mechanisms in tilt plate hitches do not tilt with the head; they remain stationary while only the king pin and tilt plate move.

16K S Features

Red indicates 16K S jaw in open position

Green indicates jaw in closed position. Visible indicator pin on 16K S verifies king pin is engaged

Husky 16K S Tilt Plate Fifth Wheel Hitch (Straight Jaw)

Product	Use with all Fifth Wheels up to*	Jaw Style	Pop-out Indicator	Fore/Aft Adjustment	Warranty **
Husky 16K S	16,000 lbs.	Straight	Yes	2 Position	5 years

HUSKY INDEX

Husky Full-Feature Articulating Head Wrap-Around Jaw Fifth Wheel Hitch

Husky Full-Featured Articulating Head Design Advantages

- Improved pop out safety hookup indicator
- Handle moved forward, further from the king pin box
- Foam grip handle for easier operation
- Self locking and release handle
- No need to manually open the jaw to hitch up
- Patent-pending Anti-Walk wrap around jaw
- Engineered/ designed tolerances for less noise
- Better fit of components
- Fully articulating head (the jaw moves with the head)
- Fore and aft adjustment on the uprights for proper "hitch over axle placement"
- Improved cross member with castle nut
- Meets or exceeds SAE J2638 fifth wheel standards
- Radius added to the top plate for rugged appearance
- Superior finish
- Yellow zinc fasteners
- Compatible with all Husky custom install kits and earlier model Husky hitches

- MORE FEATURES in a sleek Husky design
- LARGE SELECTION of no-drill/limited drill applications
- 4-BOLT installation instead of 8 for other brands
- Weight ratings that meet the needs of the RV industry
- Only line of fifth wheel hitches with fore & aft upright adjustment
- Safety hook-up indicator on all models
- Very competitive pricing
- Less inventory investment required

Husky Silver Series

Full Featured 16K W & 26K W Features

On the full-featured series, red indicates the jaw is open

THE NEXT GENERATION OF FIFTH WHEEL HITCHES

A full articulating head allows for the easiest hookups. Articulating heads move with the motion of the trailer, not the tow vehicle, for a smoother ride on rough roads. The locking mechanisms in articulating heads move side to side with the king pin.

Husky Full-Featured Articulating Head Fifth Wheel Hitches (Wrap-Around Jaw)

Product	Use with all Fifth Wheels up to*	Jaw Style	Pop-out Indicator	Fore/Aft Adjustment	Warranty**
Husky 16K W	16,000 lbs.	Wrap	Yes	2 Position	5 years
Husky 26K W	26,000 lbs.	Wrap	Yes	3 Positions	10 years

*Do not exceed vehicle manufacturer weight capacity. **See www.huskytow.com for warranty details.

HUSKY INDEX

16,000 lbs. Capacity Fifth Wheel Hitch (Black Series)

Black Series Double Pivoting Fifth Wheel Hitch Head†, 16,000 LBS. Capacity* — Features double pivoting head for easy loading and unloading on uneven ground. • One piece jaw for easy hooking and unhooking of vehicle securely wraps around kingpin, eliminating rattling. • Easy-to-spot king pin placement indicator lets you know when your fifth wheel is properly positioned. • Handle is removable for safety. Positive latch system with dual safety locking devices. • Latch & pin lock for dual safety protection. • 4° angular pivot provides tighter control of tilt to help prevent truck bed damage. • Finished with durable textured powder coated black polyester paint that resists rust and corrosion. • *Base rails required; purchase separately.*

† Husky Fifth Wheel Hitch with double pivoting head allows for detachment of trailer from truck bed without hitch binding when tow vehicle and trailer are parked on uneven terrain. High-impact rubber bumper cushions the pivot movement at the end of travel.

* Under no circumstances do we recommend exceeding the towing vehicle manufacturer's recommended towing capacity.

Note: Always face rail pins outward.

Receiver Hitches

HUSKY Class V HD Series Receiver Hitches

Our Super Duty Series Receiver Style Hitches meet your maximum trailer towing needs. Class V rating for this popular hitch is up to 12,000 lbs. ‡ weight carrying and 15,000 lbs. ‡ weight distributing. • Fits Chevy/GMC/Dodge and Ford. • 2-1/2" receiver opening. • Easy to install. • Finish is corrosion resistant powdercoat polyester black paint.

HUSKY Class IV Super-Duty Hitches

Designed to tow up to 10,000 lbs. ‡ weight carrying and up to 12,000 lbs. ‡ weight distributing. • Ideal for full size, long wheel base trucks and SUVs. • Standard 2" receiver. • Finish is corrosion resistant powdercoat polyester black paint. • Easy installation. • Uses many existing holes. *Now you can really maximize the towing capacity of your new full size pickup.*

Class III/IV Receiver Hitches

For use on full size trucks, sport utilities, vans, passenger cars, & motorhomes. Designed for towing heavy trailers. • Class III/IV Receiver Hitches are for towing up to 6,000 lbs. ‡ weight carrying and up to 10,000 lbs. ‡ weight distributing. • Custom fit. • No drilling required on many applications. • Easy to install. • Finish is corrosion resistant powdercoat polyester black paint. • Standard 2" receiver.

‡ Under no circumstances do we recommend exceeding the towing vehicle manufacturer's recommended towing capacity.
